

IN THE CLAIMS:

Please amend claims 14, 20, and 31, as set forth below.

sub  
C17  
F

14. (Currently Amended) A system for creating web documents, comprising:  
an output display device, the output display device displaying:  
a first list of objects, the first list of objects including a predefined HTML  
object;  
a second list of objects displayed simultaneous with the first list of objects, the  
second list of objects including a user defined HTML object;  
a view window for displaying a web page comprising one object from one of  
the first and second lists of objects; and  
an input device, the input device selecting the one object from one of the first and  
second lists of objects for display in the page.

16. (Previously Amended) The system of claim 14, wherein the first list of objects  
and the second list of objects are displayed in a palette window.

17. (Previously Amended) The system of claim 14, wherein the input device is a  
mouse.

18. (Previously Amended) The system of claim 14, wherein the input device is a  
keyboard.

19. (Previously Amended) The system of claim 14, wherein the output display device further displays an object editor window, the object editor window displaying a list of properties associated with the one object.

20. (Currently Amended) A method of creating a web document, comprising:  
displaying a first list of objects on a display device, the first list including a predefined HTML object;  
simultaneously displaying a second list of objects on the display device, the second list of objects including a user defined HTML object;  
receiving input from an input device selecting an object from one of the first and second lists of objects; and  
displaying a view window on the display device, the view window containing a web page including the selected object.

21. (Previously Amended) The method of claim 20, wherein receiving input from an input device selecting an object from one of the first and second lists of objects comprises a mouse clicking on the object in the one of the first and second lists of objects.

22. (Previously Amended) The method of claim 20, further comprising displaying the first and second lists of objects in a palette window on the display device.

23. (Previously Amended) The method of claim 20, wherein the user defined HTML object is created from the predefined HTML object.

24. (Previously Amended) The method of claim 20, wherein the user defined HTML object is created from another user defined HTML object.

25. (Previously Amended) The method of claim 20, further comprising:  
receiving at the input device input selecting an object from one of the first and second lists of objects for modifying a property associated with the object;  
displaying in an object editor window in the display device a value of the property associated with the object; and  
receiving at the input device input modifying the value of the property associated with the object.

28. (Previously Amended) The method of claim 25, wherein receiving input comprises receiving at the input device input selecting the object for modifying the property from a collection of objects in the web page displayed in the view window on the display device.

30. (Previously Amended) The method of claim 21, wherein displaying the web page in the view window on the display device, including the selected object, comprises the mouse dragging the selected object from the one of the first and second lists of objects and dropping the selected object in the web page.

31. (Currently Amended) An article of manufacture comprising a computer usable medium having computer readable program code means embodied therein for causing a processor to generate and display a web document, comprising:

computer readable program code means for displaying a first list of objects on a display device, the first list of objects including a predefined HTML object;

computer readable program code means for display simultaneously displaying a second list of objects on the display device, the second list of objects including a user defined HTML object;

computer readable program code means for receiving input from an input device selecting an object from one of the first and second lists of objects; and

computer readable program code means for displaying a view window of on the display device, the view window containing a web page including the selected object.

32. (Previously Amended) The article of manufacture of claim 31, further comprising computer readable program code means for displaying the first and second lists of objects in a palette window on the display device.

33. (Previously Amended) The article of manufacture of claim 31, further comprising computer readable program code means for creating the user defined HTML object from the predefined HTML object.

34. (Previously Amended) The article of manufacture of claim 31, further comprising computer readable program code means for creating the user defined HTML object from another user defined HTML object.

35. (Previously Amended) The article of manufacture of claim 31, further comprising:

computer program code means for receiving at the input device input selecting an object from one of the first and second lists of objects for modifying a property associated with the object;

computer program code means for displaying in an object editor window in the display device a value of the property associated with the object; and

computer program code means for receiving at the input device input modifying the value of the property associated with the object.

38. (Previously Amended) The desktop publishing system of claim 14, wherein the user defined HTML object is created from the predefined HTML object.

39. (Previously Amended) The desktop publishing system of claim 14, wherein the user defined HTML object is created from another user defined HTML object.
